Setup

Installation

PhoneDiversions is installed through Callisto's Open Application Manager. The installation and updating process for OAM applications is described in the chapter [Options](#) of the Callisto platform administration manual.

Privileges

The following application privileges can be assigned to a user for the PhoneDiversions application. For setting user privileges, see the chapter [User administration](#) of the Callisto platform administration manual.

State	Provides access to the State tab.
Groups	Provides access to the Groups tab.
CallHandler	Provides access to the Call Handler tab.
Reports	Provides access to the Reports tab.

Access

Configure icon

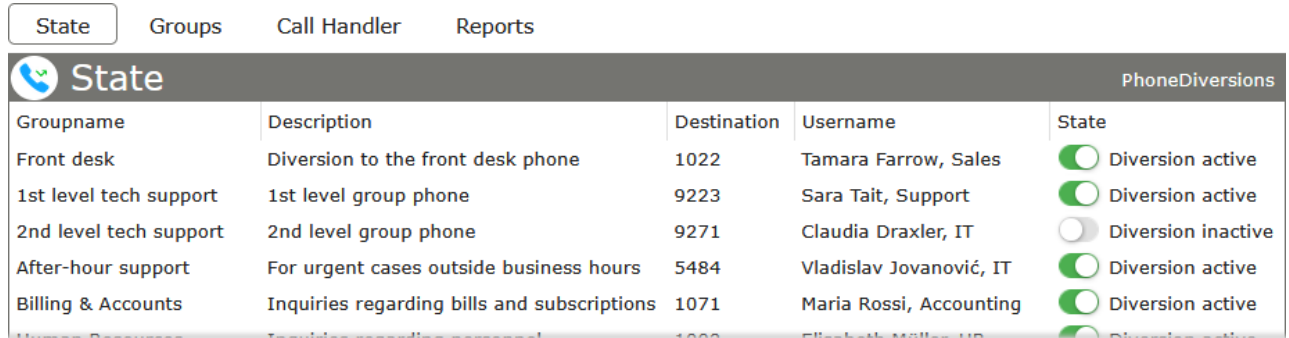

Administrators can access the PhoneDiversions configuration by navigating to System > Open Application Manager in the main menu. In the tab Applications, locate the PhoneDiversions instance and click on the *Configure icon*.

Users who were granted privileges to access the PhoneDiversions instance can do so by navigating to Applications in the main menu and clicking on the name of the PhoneDiversions instance.

Overview tabs

State

The *State* tab within the application's web GUI gives users an overview allows users to activate or deactivate diversions. This section provides the necessary controls for performing these actions.

Groupname	Description	Destination	Username	State
Front desk	Diversion to the front desk phone	1022	Tamara Farrow, Sales	<input checked="" type="checkbox"/> Diversion active
1st level tech support	1st level group phone	9223	Sara Tait, Support	<input checked="" type="checkbox"/> Diversion active
2nd level tech support	2nd level group phone	9271	Claudia Draxler, IT	<input type="checkbox"/> Diversion inactive
After-hour support	For urgent cases outside business hours	5484	Vladislav Jovanović, IT	<input checked="" type="checkbox"/> Diversion active
Billing & Accounts	Inquiries regarding bills and subscriptions	1071	Maria Rossi, Accounting	<input checked="" type="checkbox"/> Diversion active
Human Resources	Inquiries regarding personnel	1002	Elizabeth Miller, HR	<input checked="" type="checkbox"/> Diversion active

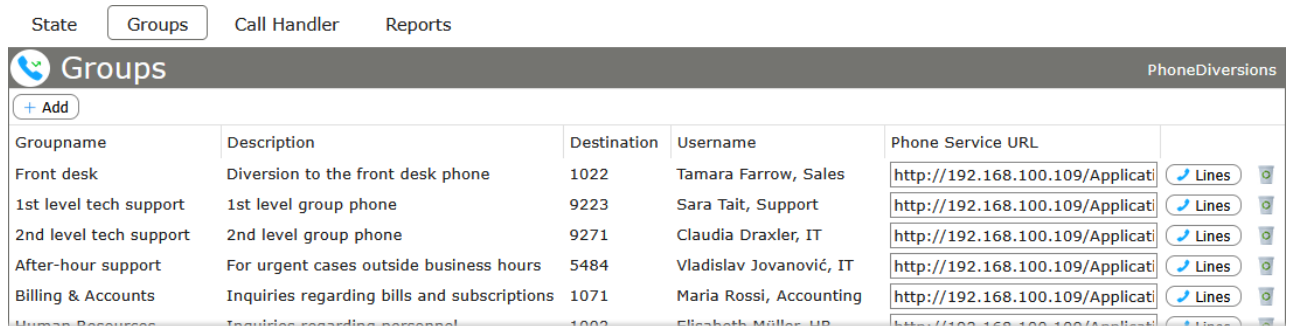

Groups

In the *Groups* tab of the application, you can manage all the defined Diversion groups. This includes creating and deleting groups. Once a group is created, it will be listed in the *State* tab.

To create a new group, click on the Add button and fill in the following form fields:

- Name: A descriptive name for the diversion group
- Description: Additional information about the group
- Destination: The specific target number destination for the group.

The Phone Service URL contains a parameter called groupID, which corresponds to each group. You can copy this URL to the Communication Manager. Further details about this service are explained in the chapter [CUCM configuration](#).

Groupname	Description	Destination	Username	Phone Service URL	Lines
Front desk	Diversion to the front desk phone	1022	Tamara Farrow, Sales	http://192.168.100.109/Applicati	<input checked="" type="checkbox"/> Lines
1st level tech support	1st level group phone	9223	Sara Tait, Support	http://192.168.100.109/Applicati	<input checked="" type="checkbox"/> Lines
2nd level tech support	2nd level group phone	9271	Claudia Draxler, IT	http://192.168.100.109/Applicati	<input checked="" type="checkbox"/> Lines
After-hour support	For urgent cases outside business hours	5484	Vladislav Jovanović, IT	http://192.168.100.109/Applicati	<input checked="" type="checkbox"/> Lines
Billing & Accounts	Inquiries regarding bills and subscriptions	1071	Maria Rossi, Accounting	http://192.168.100.109/Applicati	<input checked="" type="checkbox"/> Lines
Human Resources	Inquiries regarding personnel	1002	Elizabeth Miller, HR	http://192.168.100.109/Applicati	<input checked="" type="checkbox"/> Lines

The Lines button opens a configuration page where you can assign lines to the corresponding group. You can add, rename, or delete lines in this section. When adding a new line, fill in the following information:

- Line number: The target line number
- Description: A descriptive name for the line

The usernames shown in both the *Groups* view and the *Assigned Lines* view always display the username

associated with the given line number, as set in the [Callisto user administration](#).

State **Groups** Call Handler Reports

Assigned Lines

+ Add

Line Number	Description	Username	
1044	Main diversion line	Tenti Samatha, R&D	
1011	Secondary diversion line	Panizza Angelo, Sales	
1040	Line 1040	Marta Marić, IT	
1053	Line 1053	Scott Marshall, R&D	

Call Handler

The Call Handler tab is used to configure how incoming calls are handled.

If an incoming call to the PhoneDiversions number was redirected before, Call Handler gives users the ability to redirect the call back to the initial number (the previous audio announcement will be played to the caller). Alternatively, the audio announcement can be played without redirecting the call to the initial number by disabling the Connect with called destination number option seen in the screenshot below.

In the text field Direct Access Numbers, the user can define numbers that will be connected to the initial number immediately, both overriding the Connect with called destination number option and omitting the audio announcement.

By clicking on the Upload new audio file button, a new dialog opens where audio files can be uploaded.

Reports

The Reports tab keeps track of any changes regarding activation/deactivation of diversions, as well as call transfers.

State Groups Call Handler **Reports** PhoneDiversions

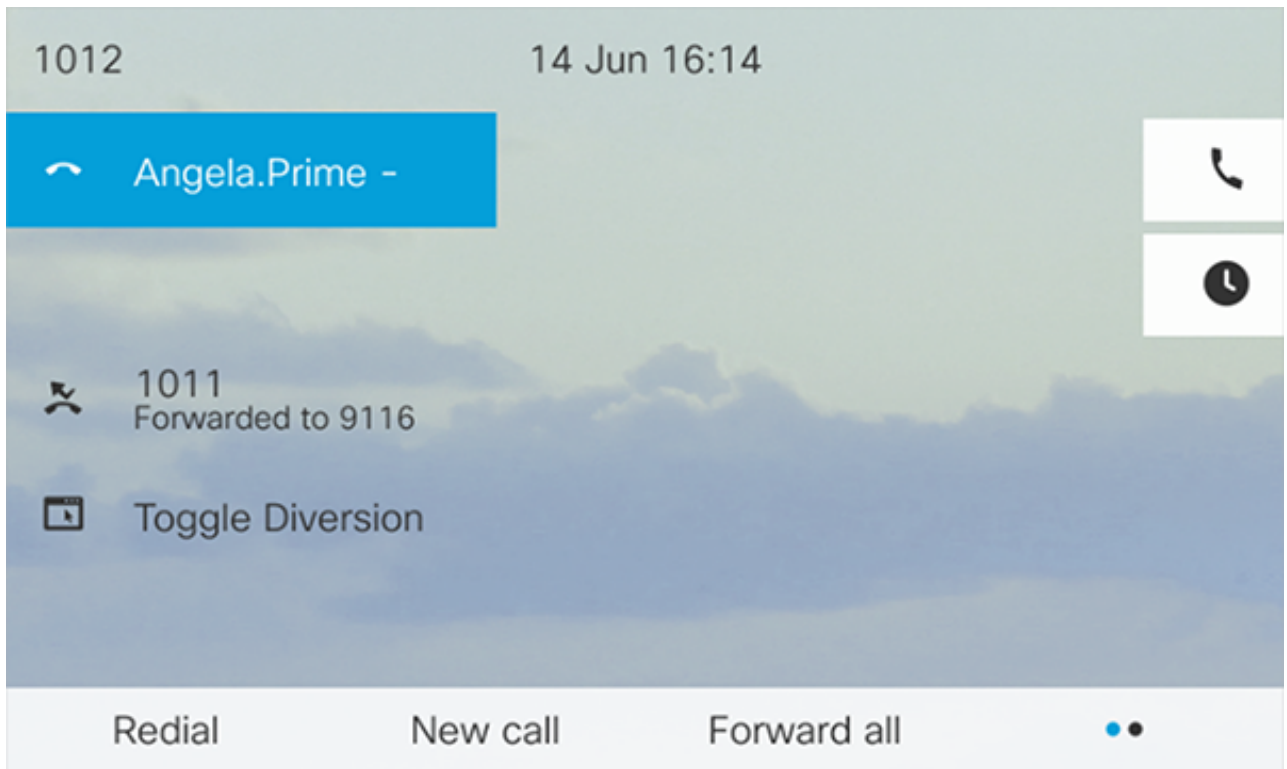

01.01.2025 00:00 - 21.03.2026 00:00 Action: All Status: All Search

Date/Time ^	Action	Status	Username	Caller Number	Receiver Number	Group
03.03.2026 16:54:22	Call Handler	Terminated		1023	1025	Test Group
03.03.2026 16:47:14	Call Handler	Terminated		1025	1025	Test Group
03.03.2026 16:17:51	Call Handler	Terminated		1025	1025	Test Group
03.03.2026 14:33:05	Call Handler	Terminated		1105	1025	Test Group

Phone GUI

Phone Menu

The PhoneDiversions service can be added to a line button on the phone. You can send the ID of a diversion group as a parameter in the URL of the phone service.

If the parameter value is defined and set in the URL, pressing the Toggle Diversion button on the phone will toggle the diversion for the respective group based on its current state.

If the parameter value is not set, and there is only one diversion group, pressing the button will toggle the diversion for that group. However, if there are multiple groups, pressing the button will display a menu on the phone, listing all the groups. From this menu, you can select the desired group to toggle the diversion.

Select

CUCM Configuration

The configuration for the corresponding Phone Service is done in the Communications Manager.

Paste the URL from the [Groups tab](#) into the Service URL input field in CUCM.

If a parameter is sent through the URL, ensure that it is not added to the *Parameters* section at the bottom of the configuration page.
