

QR code

The tab *QRCode* provides a generator for QR codes which are used by the front desk staff to assign mobile devices to cabins.

In the search field, passengers can be looked up by cabin number, first name, or last name. Selecting a search result generates a QR Code which can be read by the BabyPhone Mobile app to assign the mobile device to this passenger. Upon successful assignment, the QR code will show a green check mark as confirmation.

 **QR Code** BabyPhone

Anna Hale 10122

For more details on administration and usage of mobile devices with BabyPhone, refer to the [BabyPhone mobile manual](#).
