Reports

All SMCS alarm related actions are listed in this tab.

The reports can be filtered and exported to a CSV or Excel file. Possible filters are:

Start date	Show reports from this date on
End date	Show reports to this date
Text search	Free text search for multiple fields

The following report fields exist:

Date/time	The date and time when the alarm call was placed.
Message	The message that was used for the alarm call.
Source IP	The device from where the alarm/send message command was triggered
Result	The result of the action (*successful* or *failed*)
Group ID	The ID/Number of the group, if the action was related to a group call
